

MAR-2180J

A compact round PIR sensor for ceiling and luminaire integration.

INSTALLATION ARRANGEMENT

NTS - NOT TO SCALE

VERIFIED PRODUCT DATA

SENSOR TYPE	Passive infrared (PIR)
INSTALLATION	Ceiling or luminaire integration
CONFIGURATION	Project-specific; confirm before ordering

INSTALLATION SEQUENCE

- 1 Isolate the circuit and confirm cutout, cavity depth, voltage and controlled load.
- 2 Choose a clear ceiling position away from vents, heat sources and moving obstructions.
- 3 Connect only to the approved wiring sheet, then secure the body without cable strain.
- 4 Restore power and walk-test the coverage, delay and daylight response.

INSTALLER CHECK

Use the approved production wiring and dimensional drawing before cutting or energizing.
